

DR HOLLOWAY PRE-OP CHECKLIST FOR TOTAL SHOULDER/REVERSE TOTAL SHOULDER

1. Surgical procedure: TOTAL SHOULDER REPLACEMENT OR REVERSE TOTAL SHOULDER REPLACEMENT
2. Length of surgery is expected to be: 1 ½ – 2 ½ hours
3. This is typically an outpatient procedure. If you do have to stay in the hospital, most patients will be discharged the day following surgery.
4. You will be asked to go to the pre-admission clinic at the facility where the surgery is being performed prior to surgery if having at a Hospital. If having at one of the surgery centers, there will be no pre-admission required.
5. You will have a pre-operative clearance with your primary care doctor prior to surgery that will include labwork.
6. You will be discharged to home with a pain medication, nausea medication, if not already on a blood thinner or aspirin-you will also be asked to take aspirin daily for 2 weeks after surgery (unless you cannot take aspirin for any reason). You will also be given a prescription for an oral antibiotic to begin the day after surgery.
7. You may shower 1 days after surgery. It is okay for the water to run directly over it. Do not apply soap directly to the area. You will have a clear “mesh” tape over your incision. Leave this material completely intact-it will be removed at your first post-operative visit at the office.
8. You will have swelling and bruising after your surgery. This can persist for weeks afterwards. You should use ice or ice machine 20 minutes on and 20 minutes off. The bruising may be the entire arm and even into the chest area. You also may notice a greater amount of swelling near the elbow at the top of the sling. This is common because the sling will cause blood to accumulate at that area.
9. Most patients will be given a written prescription for physical therapy for you to take to the first post operative therapy visit. This will be sent home with you in your patient packet.
- 10. You will need to wait 3 MONTHS from your date of surgery before having dental cleaning. If the dental procedure is an emergency please call the office (865) 410-7887 to verify.
You will need an antibiotic to take 1 hour prior to your dental cleaning or colonoscopy for at least 2 years after replacement surgery. You can call our office (865) 410-7887 for prescription.**
- 11. PLEASE LET OFFICE KNOW IF YOU HAVE AN ALLERGY TO METAL/NICKEL**
